Pilot services in Norway: The CheckUp Care Bag Frank Larsen, NCT

Sifjord

The CheckUp Care Bag

Clinical parameters

- ECG
- BP and Puls
- SpO2
- PEF
- Hb
- GI
- INR
- CRP

Patient administration

Technology

- Medical equipment
- Bluetooth
- Modem
- Website
- Network

Implementing the services

- Connection via the net
- Training

Challenges

- Not able to access the patient data via the website
- Some medical equipments didn't have a display

Solution

- A new modem
-, and the health care professionals didn't have to bring with them a suitcase
- But the data was still not accessible within a reasonable time

A log sheet

- Date/initials
 - Medical equipment
 - Location (home, organisation)
 - Did you use the patient administrative system
 - Access to the data within reasonable time
 - Avoid travel (Yes/No)
- 

Result I

- 15 cases (12.05.2010-19.08.2010)
 - Medical equipment: HB=3, INR=9, CRP=3
 - Location: Home=4, Sifjord Nursing Home= 11
 - Use the patient administrative system: Yes=2, No=13
- 

Result II

- Access to the patient data within a reasonable time?

Yes= 1, No=1

Did the patient avoid travel?:

Yes= 14, No=1

Result III

- The pilot is ended
- INR is ordered

Lessons learned

- eHealth: technology, people and organization
